

Profile

Kola is an experienced Product Designer with a background in Computer Science and over 8 years of experience creating impactful digital products across Fintech, Food Delivery, and Artificial Intelligence. He has designed and shipped products used by over 50 million customers worldwide, collaborating with global brands such as Delivery Hero and Talabat. Skilled in product strategy, UX design, design systems, prototyping, user research, and AI-powered workflows, he is proficient in tools and technologies including Figma, Claude, AI-assisted prototyping, and cross-functional product collaboration.

Professional Experience

Delivery Hero, Berlin, Germany, Mar 2023 to Present

Senior Product Designer - Adtech

- Led design for Delivery Hero's first in-house Q-Commerce advertising platform (DH Ads), now used by account managers across Talabat, Glovo, and other brands. Replaced a paid third-party tool and contributes €10M+ in annual revenue.
- Built a reusable DH Ads prototyping template using Claude, enabling live user testing with functional prototypes instead of static Figma mocks, improving interview engagement and usability testing outcomes.
- Led design and user research for self-serve Display Ads (banners and stories) in the vendor portal, enabling vendors across regions to launch campaigns without account manager support.
- Designed an AI-powered creative studio enabling vendors to independently create display banners and video ads.
- Partnered with the Design Systems team to roll out the CAPE design system across regions; contributed 5 reusable components now adopted company-wide.

Kuda Bank, London, United Kingdom, Mar 2021 to Dec 2022

Senior Product Designer

- Spearheaded design for Kuda Bank Business, serving 100,000+ customers, and designed core features including invoicing, bulk payments, and estimates to streamline banking for business owners.
- Led the creation of the Kuda Business design system from the ground up, improving consistency and scalability across the product.
- Partnered with the research team to redesign the business registration flow, increasing onboarding completion rates by 40%+.
- Led design for the loan experience on the Kuda Bank Global app, creating a seamless borrowing flow for accessible, low-interest loans while supporting revenue growth.

MAXOkada, Lagos, Nigeria, Aug 2019 to Mar 2021

Product Designer

- Led the design team responsible for redesigning key MAX applications, including God View, CEX, and the MAX mobile app.

- Redesigned the MAX Driver app with a more intuitive navigation experience and a gamified rewards system, improving driver engagement and increasing rider adoption by 35%.
- Led design and user research for the MAX Loan Assets Management System, conducting field interviews with riders and remittance officers to improve asset tracking and remittance workflows.

Delivery Science aka Fieldinsight, Lagos, Nigeria, Nov 2018 to Jul 2019

Product Designer

- Led design for the company's new website and first official design system, establishing the foundation for the product's visual identity and user experience moving forward.
- Spearheaded redesign efforts for internal partner tools, including Market Insight and SME Orders (Web & Mobile), leading field research sessions alongside the research team to uncover user pain points and workflow improvements.
- Revamped the onboarding flow for the Market Insight mobile app, reducing friction and partner drop-off during onboarding.
